Github: <https://github.com/cs160-sp16/prog-01-crunch-time-mayaah>

The user can input how many minutes/reps of an activity they did and get results of how many calories they burned plus equivalent minutes/reps of other workouts instantly – no extra scrolling or button pressing required.

Decide which activity you did.

Input it in how many minutes/rep of activity you did then press the Burn! flame.

The number of calories you burned appears, along with the equivalent mins/reps for the other activities. Click on clear to input in a new min/rep activity.
